FROM:

John Eisenhower (395-3920)
Arnold Donahue (395-4800) *AD*

SUBJECT:

House Floor Position - FY 85 Intelligence
Authorization (H.R. 5399).

Based on yesterday's meeting, we have drafted the following floor position for circulation by Al Keel to principals for approval:

The Administration strongly opposes Section 107 which destroys the principal incentive for the Government of Nicaragua to cease serving as a haven for the export of subversion against its neighbors. However, House passage of this bill is necessary to move this important Intelligence authority bill to conference with the Senate where the Administration will work to eliminate the unacceptable provision. The Administration will strongly oppose enactment of HR 5399 if the restriction in the present Section 107 remains in the bill.

Please advise us as soon as possible.
